

Commercial Labs in Wisconsin - Food Product Testing

Following is a list of Wisconsin certified labs that test food samples for pH and/or water activity (a_w). Contact the company directly **before** shipping or dropping off samples. Most services are cash-on-demand. Results will generally be emailed or faxed to the customer. The laboratory will indicate how much sample they need and how to package the sample. You do not need to provide a full jar or package of sample, a small sample representative of the whole is sufficient.

Lab report should list: 1) Sample ID, 2) Sample production date, 3) Analysis date, 4) Result(s). Sample ID **must clearly link to recipe**.

Important: For a solid/liquid product (pickles), the pH of the solid phase only (blended with distilled water) is sufficient.
