

## Commercial Labs in Wisconsin - Food Product Testing

Wisconsin labs which test food samples for pH and/or water activity ( $a_w$ ). A small sample, perhaps in a plastic container, may be submitted as long as it is representative of the processed product. Contact the company directly **before** shipping or dropping off samples. Most services are cash-on-demand. Results will generally be emailed or faxed to the customer.

**Lab report** should list: 1) Sample ID, 2) Sample production date, 3) Analysis date, 4) Result(s). Sample ID must clearly link to recipe.

**Important:** For a solid/liquid product (pickles), the pH of the solid phase only (blended with distilled water) is sufficient.
