

## **Commercial Labs in Wisconsin - Food Product Testing**

Wisconsin certified labs are able to test food samples for critical food safety parameters, usually pH (acidity) or water activity ( $a_w$ ). **Contact the company before** shipping or dropping off samples. **Shelf life testing is not generally needed.** Nutrition labeling may be optional, see <https://foodsafety.wisc.edu> for information **on food product labeling**.

NOTE: If you are working with a food safety consultant, that individual may do product testing for you. National directory of [processing experts](#). **Lab report** must list (at a minimum): 1) Sample ID, 2) Sample production date, 3) Analysis date, 4) Result(s).
